Improve access to safe drinking water and sanitation facilities

1. Reduce incidence of waterborne illnesses
2. Increase access to and use of improved water sources
3. Increase access to and use of improved sanitation facilities
4. Increase awareness of the importance of hygiene and improved sanitation facilities

Impact Indicators
Outcomes (Expected Results)
Outcome Indicators
Outputs (Expected Results)
Output Indicators

3.1 Prevalence of diarrheal disease in children under 5

- Reduced incidence of waterborne illnesses
- Increased access to and use of improved water sources
- Increased awareness of the importance of hygiene and improved sanitation facilities
- Increased access to and use of improved sanitation facilities

3a Proportion of households using an improved drinking-water source
3b Proportion of households using an improved sanitation facility

3.0.3 Number of new or rehabilitated water sources
3.0.4 Presence of a functioning improved water source at epicenter site
3.0.1 Number trainees in WASH Education
3.0.2 Number of animator trainees in WASH
3.0.5 Number of latrines constructed, installed, or rehabilitated
3.0.6 Presence of public latrine at epicenter site
